RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I now understand that I could have decided to not fabricate the weldments to the Main Gear Legs. I chose to use a 3rd party welder that had a good reputation in my domicile at the time. As Amateur-Builders, I thought I was making a good decision at that time over 12 years ago.

Every preflight inspection since then and every 12 month Condition Inspection, did not let on that the good looking weld from the outward appearance was faulty deep inside. Hence, weak.

I am very sorry for the trouble this has caused. I built it, as an Amateur-Builder. I did all of the Experimental Test Flying throughout Phase 1 on this aircraft. The last 12 years have been an education and recreation. I thought I was being very careful at each progress point during the 7 year build.

Incident report N512JA 08June2024 10:08 am VFR flight TN20 – TN87 - KMNV (Madisonville TN) Monroe County TN. Cruise Alt initial 3300MSL to TN 87 Thence climb to 4500MSL prior to casual decent to pattern.

After a normal landing a replica aircraft manufactured by me as a ¾ scale P-51 Amateur-Built Experimental, certificated in 2012, had a violent tail-wheel shimmy develop as a result of a mechanical failure of the R attach bracket connecting the tail-wheel retract hinge to the air-frame.

The unplanned, violent shimmy developed, broke the retract hinge, and prevented the normal ground steering control. As the aircraft began to veer left toward the runway edge. Attempt to administer full opposite rudder was ineffective due to decelerating, slow, after-landing airspeed. Additional braking was added to overcome the veer to left, but stresses invoked during that movement caused a 2nd mechanical structural failure of a welded (fabricated) joint at the R main gear lower weldment.

Just prior to the aircraft departing the runway, at a very slow speed, the L main gear lower weldment failed as well and the aircraft came to a complete stop just clear of the runway in grass. (Approx 12-15 feet) Just clear of the landing Runway 05.

The R wing dropped to ground. The composite Whirlwind propeller blades sheared from idling engine. Immediate engine shut off and securing of all electrical systems and fuel system was completed immediately. Halon Fire Extinguisher at the ready. No smells or fumes apparent.

Note: 1 The weldments of the main gear lower weldment parts, referred to above, were NOT fabricated by the Titan T-51 kit supplier. They were fabricated by a 3rd party that I chose/commissioned 12 years earlier. The weld penetrations of these gear attachments underneath the weldment were undetectable to the normal daily pre-flight and 12 Month Condition inspections. The welds, of the main gear lower weldments underlying quality remained undetectable for 12 years and much service.

Note: 2 The tail-wheel hinge attach bracket that broke 1st was from the kit supplier. A Service Bulletin issued in 2012 requires 12 Month recurring inspections of that area. Last Condition Inspection dated 2-26-2024 found no visual cracking.

After securing the aircraft systems I felt tension in my muscular lower R lumbar area, so I asked the first responders, at the aircraft scene, to call Paramedics as a precaution. They were present nearby. This was a normal Saturday fly-in breakfast event. The KMNV Airport Manager was present. I asked them to take me to a medical facility, familiar to me, as a precaution. That transport was successful. I was released from UT Medical Center Knoxville, later that afternoon. I am fine, back at the airport and dealing with the disassembly and transport of the aircraft to a secure hangar Russ Standifur coordinated limited permission to relocate with NTSB agent.

I was sole occupant of my aircraft.

Tom McCosh [REDACTED] is the airport Manager at KMNV.

He has assured me that there are no liability/damage expenses, from the airport, to me resulting from this incident.

I met with ASI Russ Standifur Nashville FSDO on Monday 10Jun2024 for a complete debrief. He helped me surmise the sequence of events listed above. I appreciate his service. This narrative is filed with him.
