

APPENDIX A

On 6/30 I decided to take a flight from KUNI to KHOC just relaxing a bit. The winds were reported on the AWOS at 350 at 9 with no gusts reported. As I was taxiing I heard Demetrios Prokos reporting about 15 miles to the north. Demetrios told me the clouds were 6500 from Sandusky and the ride was smooth the

ride was smooth the entire way. I proceeded to take off from runway 7. At about 150 ft the winds seemed to be coming from the south as opposed to the 360 indicated. I had a lot of right rudder as usual for my plane and had to give full RT rudder and aileron correction as well. It was extremely turbulent as well. I reached out to Demetrios's to relay that information to

that information to him as well. I climbed out to the right and proceeded to KHOC. It was smooth as soon as we got above 2000 ft. We flew to KHOC taxied back and took off again for KUNI. We were doing a practice approach and on file we were a little high, so we went around. I noticed Demetrios plane and a pile of rescue vehicles on the side of the highway. I landed

highway. I landed and the AWOS was reporting 350 at 13 knots. Again it was bumpy on the decent and as we approached the runway we were having a direct 18 knot crosswind from the north according to my instruments. Not at all what was reported. Thanks for listening. Edward J Zatta

Thanks!
