Subject: ERA24LA312, Brake Inspection Notes

Contact: Curtis Pennington, A&P Mechanic, IA, Hangar 7

The following are the inspection notes for the right brake assembly:

Brake caliper free before removal
Both pistons fully seated in caliper
No leaks noted, brake linings show little wear
caliper pins have small amount of buildup at base of pin
Pistons have good o-rings

I cannot find any problems with right brake assembly

No flat spots, no outside tread [on tire].
