

Joshua Young
Air Safety Investigator
AS-ERA

Date: 9/24/2024

Subject: ERA24LA341, Recovery Statement on Fuel Recovered

Contact: Michael O'Shea, Recovery Manager

Through in person conversation Mr. O'Shea stated that when the airplane was recovered about 3 gallons of fuel was recovered from the right wing fuel tank and about 9 gallons recovered from the left wing fuel tank.

Photo 1: Total amount of fuel recovered from the airplane.

The IIC requested for Mr. O'Shea to fill the right wing fuel tank with water to check for leaks or breaches to the fuel tank. He sent the IIC a video of the wing full of water and no leaks were noted indicating the fuel tank was not breached.
