

Joshua Young
Air Safety Investigator
AS-ERA

Date: 10/8/2024

Subject: ERA24LA341, Maintenance Records Review

A review of the aircraft maintenance records was conducted by the IIC.

The first entry in the airframe logbook was from February 7, 1963, and the last entry in the airframe logbook was from April 1, 2024. The review found no entry to indicate that Beechcraft Service Instruction 0624-281 was ever complied with. The most recent annual inspection was completed on April 1, 2024.

The first entry in the engine logbook was from July 24, 1963, and the last entry was from September 10, 2023. An engine overhaul and an annual inspection completed on September 1, 2023. The entry from September 10, 2023, was for the reinstallation of the engine on the airframe.

The first entry for the propeller was an FAA Form 8130-3 form completed on June 10, 1998. The last entry was for the propeller annual inspection on April 1, 2024. The propeller was overhauled on May 8, 2023.
