Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight was to be from KVPZ to KFCI. About 90 minutes into the flight it was VFR on top at about 11000 feet. I was with flight following at all times. After asking for vectors around weather I noticed the fuel burn was much higher than expected. (I left with full tanks with a total of 38 gallons which will typically provide 4 hours with a half hour reserve. Instead a normal 8 gph burn I calculate it was over 14 gph) I then asked ATC for a vector to the nearest airport. I do not recall but I was then vectored to the first airport of three during the flight. It was determined it was IFR and I was vectored to the second airport. I don't recall the reason but I was then vectored to the third airport. I ran out of fuel seven miles short. I then made an emergency landing in a field which was had gentle uphill slope.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

1. Choosing to not fly VFR on top.
2. Closer attention to fuel gauges earlier in the flight.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Not sure at this point. I would speculate there was some type of fuel leak.
