

Joshua Young
Air Safety Investigator
AS-ERA

Date: 9/12/2024

Subject: ERA24LA375, 6120.1 Clarification

On 9/12/2024 the IIC reviewed the 6120.1 form sent in via electronic mail by the pilot. The form as printed shows the pilot's total time all aircraft as 10 and the pilot's total time this make & model as 3 due to a glitch in the form. The pilot's true times were shown when the numbers were clicked on and are 10,351 and 3,068 respectively.

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents**BASIC INFORMATION****Accident/Incident Location**Nearest City/Place: Bolivar State: TNZIP: 38008 Country: USALatitude: 35.18368 Longitude: 089.10010

NOTAMS (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Landing gear, dispersal equipment, prop, engine, airframe, tires, all received damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Bolivar airport on runway 1. After departure, I made a left turn to head SW to my field that was approximately 6 miles away. After making several passes to finish up a field that I started the previous evening, I started a new field that parallels Hwy 18. After making a few passes I noticed that my fuel flow was lower than what I had set. I was making a turn to intercept my next pass and pushed the power lever up some to have more power and the engine started to lose power. At this point I knew something was wrong and pushed power and condition lever to the forward stop. Nothing changed and the engine continued to "roll back" to below idle speed. I immediately hit the dump switch to jettison the load of cover crop seed. I saw a hay field directly in front of me and determined I could make the field, but knew I had to dodge some trees to get there. I slowed down and applied flaps, while also radioing my load man that was still at the airport. I told him I was crashing, he responded. After that I was just focused on not stalling while trying to land on the first part of the hay field, in order to not end up in the trees. I ran out of airspeed, altitude, and ideas all at the same time while full stall landing where I had planned to put the airplane. I bounced the airplane on a "knoll" which launched me back into the air. After floating and trying to keep the airplane from climbing any, it landed in a small ditch. This impact ripped off the spreader, and damaged the landing gear. The airplane slid 100-150 ft up a hill and spun around 180 degrees from original heading. At that point I shut off the fuel, Gps, and electronics and rapidly exited the airplane in case it caught fire.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Should have stayed in bed.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Unknown, under investigation.
