Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Tail boom doublers and antenna,

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

SP Patrick Wright, LTJG, USCG
 IP Matthew Case, CAPT, USAF
 Location KMAI Runway 08 departure end
 Sortie 1401
 TN945TC

IP and SP departed KDHN to KMAI to conduct training. At approximately 1130 the members entered a planned steady state autorotation maneuver terminating with a slide to RWY 08. Winds were a favorable headwind and conditions were clear. Previous the A/C had completed 2 slide landings to the runway, favoring the left side of the centerline due to the condition of the surface of the runway on the right side of the centerline. The maneuver was planned and the descent was controlled, passing the briefed abort point to continue to the slide with throttle at idle. At approximately 100ft AGL SP began flare, bleed off airspeed and leveled at approximately 30ft AGL with good touchdown point, airspeed and rotor RPMs for cushioning. The touchdown point was past midfield at KMAI and centered in the left side of the runway. IP followed controls to the ground and entry into slide. Slide was entered with good heading control and decreasing ground speed. During slide the A/C began shuddering violently. The SP's headset, sunglasses and kneeboard were all sent forward, and the left shoulder restraint came undone from the seat belt. The A/C began a left turn as it's forward speed was arrested with collective full down and full right pedal. Upon coming to a complete stop, SP guarded controls, IP conducted inspection of A/C and determined A/C should be shutdown due to damage. Shutdown procedures complete, IP notified CAE and KMAI to NOTOM Rwy 08.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
