Subject: ERA25FA082, Common Traffic Advisory Frequency Recording

Contact: www.Liveatc.net

The NTSB IIC was able to retrieve a recording of the Common Traffic Advisory Frequency for the airport the accident airplane had just departed. The recording was obtained from www.liveatc.net on December 21, 2024, at 2033 EST. The recording began about 1730 UTC and was 39 minutes 18 seconds in length. The recording captured the accident airplane entering the traffic pattern, report of their intent to perform a touch-and-go landing, report of their departure, and their mayday call.
