Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft damaged beyond repair. No non-aircraft damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On October 11, 2024 at approximately 17:30 EDT, I departed 9A0 (Lumpkin County, Ga airport) for a scenic return to my home base, KCZL (Calhoun, Ga). A typical "bluebird" recreational flight in north Georgia on a Friday afternoon. Approximately 12 miles NE of KCZL, engine power was lost, due to fuel exhaustion. An emergency landing was required on a sod/turf grass farming facility. Upon contact with the terrain, the landing gear collapsed due to excessive vertical speed, the propeller contacted the surface (engine was not wind milling) and the wings folded downward and forward due to inertia. I was the pilot in command and had no passengers. I was uninjured and there was no non-aircraft property damage. I am the sole owner of the aircraft, it was uninsured and unencumbered. The aircraft is damaged beyond repair, the engine and instrumentation are suitable for re-use.

On Saturday October 12, out of respect for the property owner, I removed the aircraft from the location as it is an operating farm with harvesting operations in process. Upon review of USCFR, Title 49, over the weekend, I learned of my legal obligation to notify the NTSB. I contacted the NTSB and the FAA on Monday morning, October 14, 2024, hence this form and commentary.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

The accident could have been prevented had I executed appropriate fuel management procedures. Failing to confirm the fuel level prior to departing 9A0 and while in flight is a significant pilot error, a mental one. Additionally, the aircraft was not equipped with a low fuel level warning indicator to serve as a visual reminder. I do not have and did not prepare an after take-off check list which, if used, would have alerted me to confirm fuel level prior to leaving the 9A0 air space.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
