**Description of Damage to Aircraft and Other Property** *(Use additional sheet, if necessary.)*

Skywagon N3246E- the rudder was completely bend over. There was also some crinkles in the fuselage on the right side.

Piper Cub N4843M - the one blade of the propeller was bent. The left wing tip was badly mangled

Maule N205MX-both wings were destroyed after running into the trees. The struts were bent. The cowling was damaged. The right passenger window (back seat) has a hole in it. Left outboard fuel tank was leaking fuel (which was caught in buckets the best that it would be.) The prop was the first thing to hit the trees.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We left our home strip on Saturday, October 12th at 8:59AM and headed directly to 56WV for a fly-in. Our plane (plane 1) carried Jim Kusian (pilot), and two passengers. We began landing at approximately 11:00AM. This strip is located in a valley and is on an island. As we began our landing, we had a bounce and veered a little to the left. Our left wing tip caught the rudder of the Skywagon (plane 2) This caused us to turn left without much, if any, control, and headed us into the woods. On the way there, our left wing hit the propeller and left wing tip of the Piper Cub (plane 3). After that our plane went into the woods, and was stopped by bending the soft wood trees. No one was in plane 2 or 3. There were no injuries to individuals.

**OPERATOR/OWNER SAFETY RECOMMENDATION** *(How could this accident/incident have been prevented?)*

Had the plane been landed approximately 300 feet further down the runway, this would have been avoided.

**MECHANICAL MALFUNCTION/FAILURE** (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
