Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Minor denting on the outboard section of the left hand wing tip.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After departing KGAS at approximately 11:00am on 10/25/2024 for an instructional flight, we crossed the HVQ VOR at 1,900' and announced over the Mallory CTAF that we would be entering left downwind runway 34. We entered downwind at 1,700 feet and announced again that we were downwind runway 34. We scanned the runway and runway environment for any obstructions, wildlife, or other planes. Seeing none (It should be noted that part of runway 16 was obscured due to trees), we announced left base and then final to runway 34. I slowed the plane to approximately 40kts and we encountered a brief rain burst for about 5 seconds. The windscreen cleared and I could clearly see the runway. I flared the plane and touched down just past the numbers, slowing the plane rapidly to a slow taxi speed of 5-10mph. The newly paved runway was very dark after the brief rain, and the nose of the airplane sits high, limiting the forward view. I taxied the plane down the runway to take off from runway 16, as is standard. With approximately 750 feet remaining, the figure of a man suddenly appeared to our left, walking on the left edge of the runway. We could not see him due to his dark jacket and hood essentially camouflaging him with the runway and dark terrain. The outboard wing struck him in the hip and hand, causing him to fall. We were able to stop the plane immediately and turned off the engine. I exited the plane, dialed 911 and began talking to Mr. Stan Young. He was conscious and alert, and complained only of pain in his right wrist. He was able to stand and walk to a vehicle, which took him to the ambulance that had just arrived at the far end of the runway.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Perhaps this incident could have been prevented if there were a loud speaker mounted along the runway where the CTAF radio calls could be heard and anyone on the runway could clear. There is no taxiway, so access to many hangars has to be from the runway. A mid-field fly over may have alerted Mr. Young to our presence, and we may have been able to identify him on the runway, but this is doubtful. Mr. Young normally carries a hand-held radio to listen for traffic calls, but he left it in his car that day.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
