- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Nose gear bent, collapsed, engine cowl top and bottom crushed, prop bent, spinner broken, engine mount broken, skin on lower fuselage behind firewall wrinkled, left main wheel pant caught on turf, rotated forward and punched a hole in the bottom of the left wing. Nose wheel plowed the turf for about 30 feet.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Boarded the airplane at approx. 13:30 EST for a local flight. Taxied to the runway 11/29 where i back taxied to 11 exited the runway and did my engine check and runup. Everything checked normal. Taxied on to the runway and departed 11. take off was normal and i climbed to the east to 3000 ft where i performed some steep turns about a point. Flew north across a couple of airports for a while then turned south. I engaged the auto pilot for awhile checking how well it would hold altitude and track since there was some moderate turbulence at 3000 feet. After 30 minutes or so i decided to go home because the turbulence was no fun, and i really didn't have any where to go. Entered left pattern for runway 29 flew the pattern and did a low pass to check the windsock and decided to land on 11. Turned onto 29 left crosswind to 29 downwind and then crossed the runway to enter the left downwind for 11. Approach was normal slowed to 70 knts and 20 degrees flaps, noticed there was a slight breeze from the south, nothing to worry about. Pulled power crossing the threshold, felt the main gear spool up as i touched down, then i crossed the little swell (hump-dip) in the runway and i was airborne again, the next thing i knew the nose gear was collapsing and beginning to skid, then the nose was on the ground with the prop stopped. My glasses and headset had departed my head. The ELT was going off and i reset that and turned off the power to everything and shutoff the fuel from both tanks. I exited the airplane. My neighbor who heard the noise came over to help. We lifted the front of the airplane using a sling on a tractor bucket and pulled it to my hanger. I called the WX-BRIEF the next day to report the occurrence.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

No recommendation.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Total Time/ Cycles On Part

_____ Hours

_____ Cycles
