November 18, 2024 Approximately 12:30 EST

KDYL ATIS said wind 330 @ 11 gusting 18.
The wind sock was directly across the runway.

I was set up to land on runway 23. I entered a downwind at about 1400 feet MSL (bar 29.90). I flew and did everything as I normally do including saying all actions out loud. I was at 17 inches of manifold pressure and 2400 RPM. I called gear down and one, two, three green, (I count them out loud). Then put down the first notch of flaps. I explained that these settings will get you to where you want to be with a minimum of playing with the power. These settings give a speed of about 115kts, and about a 400 foot per minute descent.

I turned base at about 1100 feet and a half mile to the side of the runway and made my traffic call. Then rechecked all settings in the plane. Fuel in, three green and one notch of flaps. At this point we were about 100 kts.

I turned final just over a mile out and made my last traffic call. At about a half mile and 400-500 feet I came back on the power to below 15 inches and put the prop full in. I did my short final check out loud, three green, fuel and prop forward full flaps. This slows the plane down to about 85kts over the numbers and about 25 feet. I then came all the way back on the throttle and started to round out at about three feet above the ground. Without warning the plane ballooned to about 20 feet and I said I am going around. Tom in the right seat said he agreed. (There were two passengers in the plane). I pushed in full throttle and started to bring up the flaps and the gear. All of a sudden without warning I felt something strange and said "I don't like this out loud".

Almost immediately I felt the plane drop out from under me. I believe I was full forward on the yoke to not stall. We ended up on the left side of 23 wings fairly level when we pancaked into the ground. We were sliding forward to the left and went down about a three to six foot embankment. Then slid out into the tie down area towards a Cessna 310. I yelled get down because we were sliding right into the tip tank on the Cessna. When we came to rest, Tom was first out of the plane followed by his dad. I turned off the master and the alternators but I don't think I turned off the ignition. I was last out.

People started arriving in less than 30 seconds and soon I was in an ambulance on my way to Grandview Hospital and they were taken to Doylestown Hospital.

Sincerely;
Irving Stein
