Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Broke long tube on skid, other damage to be determined

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KBVK approximately 11:00 to KLAL arriving at about 11:35. Prior to entering KLAL airspace, I received KLAL ATIS. Winds reported as 340 at 10 gusting 18. Contacted Tower and requested to land at Lance Aviation helipad; advised to fly down wind of runway 28 staying south of active 28 runway and cleared to land at own risk Lance aviation. Arrived overhead at Lance Aviation about 30' above pad wherein I executed a reverse turn to land into the wind. Gust of wind overwhelmed availability of anti-torque pedals resulting in LTE Landed upright landing wherein the skid was damaged on a curb surrounding asphalt. Pilot performed a normal shutdown and exited the aircraft.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

LTE could have been prevented with a better planned landing knowing of the possibility of the wind gusts actually encountered. Pilot entered the FAA Remedial Training program and received ground and flight training specifically to avoid future LTE encounter.
