☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Right wing of aircraft struck ground during the landing phase and the runway/taxiway identification sign.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While relocating the aircraft from RYY to DAB the landing gear indicated unsafe while on final for the RNAV 34 into DAB. Once we saw it we requested low approach only to have tower inspect gear and they confirmed what our lights were indicating which was right gear was still up but the left main and nose locked out. after the low pass we starting holding over the racetrack and started trouble shooting once all checklist had been complete we got into contact with MX on 121.95 to further trouble shoot. after about 30 minutes they had us head to the north practice area to maneuver more aggressively to try and get the gear to drop. after about an hour the decision was made for the emergency landing. we set up for a 5 mile final and i flew the plane front right seat while the left seat pilot handled radios and switches. i flew the landing as normal and once we entered ground effect we turned off the engine masters followed up by electrical master. by turning off electrical master this caused the gear to drop so we touched down on left main and nose. landing was soft but veered right immediately due to right wing being on the ground we struck a runway light and a taxiway sign before coming to a stop both i and the other pilot evacuated with no injuries and walked away.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Right main gear never extended
