DAMAGE TO AIRCRAFT AND OTHER PROPERTY

Aircraft Damage		Aircraft Fire		Aircraft Explosion	
☐ None	☒ Substantial	☒ None	☐ Both Ground and In-Flight	☒ None	☐ Both Ground and In-Flight
☐ Minor	☐ Destroyed	☐ In-Flight	☐ Fire at Unknown Time	☐ In-Flight	☐ Fire at Unknown Time
	☐ Unknown	☐ On-Ground	☐ Unknown	☐ On-Ground	☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

The aircraft received damage to right wing structure and fabric from a hangar door. The propellor was bent and contacted the ground. The left wing tip received minor damage. The cowling recieved minor damage. The hangar door remained upright but was knocked off the track. The hangar door repair was assessed to be approximately \$2,000 - \$4,000 in total labor and repair costs. The aircraft, including engine, is assessed to be repairable.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

- At approx. 10:30, the aircraft, N161DW, departed KFYM at, and flew to KTHA, where five landings were conducted.
- The aircraft was parked and fueled at the KTHA self-serve fuel station.
- At approx. 11:35, the electric start procedure was attempted multiple times.
- The area was clear, the aircraft was chocked, and the engine hand propped.
- Upon engine start, the RPM increased sufficiently to jump the chocks
- Aircraft rolled approx. 60 FT, struck a hangar door, the propellor struck the ground, and the aircraft and engine stopped
- There was no fuel spilled or fire
- The megnetos, master switch, and fuel valve were all turned off immediately
- The aircraft was moved to protect it from the hangar door potentially falling on it
- Aircraft sustained damage assessed as repairable, including airframe and engine
- Hangar doors damged - assessed repair approx. \$2,000 - \$4,000 including labor and parts
- No persons injured or other property was damaged
- FBO immediately contacted the FAA about the event on behalf of the owner

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

The procedure recomended for hand propping an aircraft strongly urges to tie down the tail, have a qualified and trained individual at the throttle, and chock the wheels. These procedures should always be followed to insure consistently safe engine starts. Further more, safety is always the number one objective in general aviation and every precaution available should be followed to prevent similar situations from happening again.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
