Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Damage to both engines/propellers & under carriage of aircraft.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I, Brian Gradert, who is a commercial single engine land rated pilot was taking my multi-engine land rating add-on checkride out of KCEY on December 19, 2024. We were flying aircraft N755RP which is a 1961 Beechcraft B95A owned by Skyview Aviation. After conducting our initial takeoff, checkride maneuvers, and first successful landing, we departed KCEY and stayed in the pattern to perform our single engine approach and landing. We stayed in the pattern and entered a left downwind for runway 23. My focus was on maintaining airspeed and directional control of the aircraft as per the steps on a single engine approach. I remember applying flaps and thought I had remembered to put the gear down, but I unfortunately forgot that step. We continued the base and final legs of the pattern, adding additional flaps until full flaps were down. The approach to landing was stable and everything seemed well, but I failed to ensure that the gear was down. We flared to land and the aircraft touched down on its belly and skid to a stop. We shutdown the engines, turned off the fuel, turned off the mags, and turned off all electrical. There was no fuel leaking or post fire from the incident. One thing we noted after processing the event was that with full flaps down and with low manifold pressure, the aircraft system should have had a gear up audible warning indication. Myself and the DPE do not believe that the audible warning sounded even with two of the needed items engaged (full flaps or low manifold pressure on the engines).

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
