Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft: Left wing was sheared off outside of the nacelle, left nacelle damaged, one blade of left prop curled, left outboard horizontal stabilizer slightly damaged, wind shield broken out, fuselage above pilots seats caved in, right and left cockpit doors departed aircraft, right wing leading edge blown out outboard of nacelle.

Property: Severed high tension power line

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Rock Hill, SC KUZA VFR at 15:55 EST. Climbed to our cruising altitude and followed a direct path toward KDAB, then direct KMLB. Minor altitude and course deviations to maintain VFR were made throughout the flight. At approximately 18:35 EST we began our descent for landing into KMLB. We flew toward the VFR reporting point of Lake Washington approx. 5 nm northwest of the field. Just prior to contacting Melbourne Tower we experienced loss of power with erratic power surges on the right engine. Blake Raymes (PF) continued to fly the aircraft and communicate with ATC, and Nicolas Carder (PM) began to run checklist flows for potential engine failure. When initial checklist flow did not remedy the issue, it was determined that the safest course of action was to secure the engine. We turned direct to the airport and contacted Melbourne Tower and declared an emergency. Tower cleared us to land on any runway, stating 9L was closest. Entering the Class D our left engine began to experience similar characteristics to the right engine prior to shutdown. Checklist and flows were followed for the given situation again, with an attempt to restart. Restart was successful momentarily on the left engine and provided power for a short time. Erratic power surges on the left engine occurred again. Unable to maintain altitude and realization that we would not make the runway, we determined the safest course of action was to look for an off-field landing location. We informed Tower we would not make the runway and the controller assisted with possible landing options. Interstate 95 was the closest location, so we started to turn the aircraft to the west, and secured the left engine to reduce drag. As we approached I-95 we determined that it would not be a suitable landing sight due to high traffic volume and the potential of other possible damages, or loss of life. We saw the Renninger's Flea Market parking lot on the west side of the highway. We assessed that there were power lines on the west side of the parking lot, but made the decision that this was the best location for us to land and limit possible casualties to two. As we made the slight turn northbound over I-95, gear was extended and we prepared for landing. As we got closer to the parking lot our landing light illuminated a second set of power lines that had not been seen previously. An attempt was made to avoid them but at this point, we were unable to. The left wing made contact with one of the power lines, and the aircraft came to rest on its gear facing southbound in the parking lot. Both pilots egressed the aircraft unassisted, and met at the tail. Nicolas Carder called 911.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Total Time/ Cycles On Part

_____ Hours

_____ Cycles

Time Since This Part Inspected/Overhauled

_____ Hours

FUEL & SERVICES INFORMATION

Fuel on Board at Last Takeoff

(Convert from pounds, as necessary)

60.0 Gallons

Fuel Type

☒ 100 Low Lead☐ Automotive☐ Jet A☐ Jet A-1☐ Unleaded AV☐ Other, specify _____

Other Services, if any, prior to departure:

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☒ Yes ☐ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

Both pilots egressed unassisted through their respective door openings, and walked away from the aircraft

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft.)

Aircraft Registration Number

Manufacturer: _____

Damage to Other Aircraft:

☐ Destroyed☐ Minor☐ Substantial☐ None

Model: _____

Registered Owner of Other Aircraft

Pilot of Other Aircraft
