- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

About 1.5 to 2 feet inward from the right wingtip of N9137H, the propeller of N8454H severely sliced the wing and right aileron. In addition, the right nav light and strobe light wiring were severed after the collision. N8454H has not had any substantial damage except for the fact the engine experienced a sudden stoppage of the engine after the collision.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I am reporting a runway incursion (accident) resulting in substantial damage to two aircraft (N9137H and N8454H) with no injuries to any persons. The event occurred on Saturday 14 2024, at Old Bridge Airport (3N6) on the taxiway leading to the hold short line of Runway 6. Onboard N9137H was myself (Walter Young, CFII) in the right front seat and my student (Maamon Sakar), who was seated in the left front seat. Onboard N8454H was Vikas Chopra who was seated in the left front seat.

My student and I were preparing to depart for a flight to Cape May/Wildwood Airport (KWWD) and return back to Old Bridge Airport. Just prior to leaving the flight school's ramp area, Maamon performed a break check by applying throttle output, letting the airplane taxi forward, reducing the throttle output, then applying the breaks to bring the aircraft to a stop. I then repeated this procedure by applying throttle output, letting the airplane taxi forward, reducing the throttle output, then applying the breaks to bring the aircraft to a stop. I was satisfied with the break check and instructed my student to taxi to the airport's self-serve fueling station and fuel up.

During the taxi to the fuel station, Maamon advised me that the left break was performing weaker than the right break. Being familiar that this plane sometimes requires break differential for effective operations, I responded by reminding him that sometimes this plane requires more input on the left rudder/break to be as effective as the right rudder/break. Maamon adjusted based on my instructions and performed a left turn and stopped at the fueling station without incident. We fueled up the airplane and then continued taxiing to the hold short line via a left and then a right turn.

Once we arrived at the hold short line, my student attempted to bring the airplane to a full stop, however the airplane began drifting to the right and Maamon stated "how do you stop this thing?" Upon seeing the airplane drift to the right and hearing Maamon's statement, I immediately applied full left rudder, left break and reduced the throttle to idle. despite these measures, the plane continues to drift to the right at which time, the right wing struck the propeller of N8454H. I immediately checked to make sure my student and Vikas were not injured. I reported to my boss Vikas, who happened to be the pilot in command of n8454H which propeller was struck.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

To prevent the recurrence of this event, I will make sure to do extra brake checks to make sure the airplane is operating in a safe manner. In addition, I will continue to make sure my students taxi at slow speeds to ensure control and safe operation of their airplane.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The left brake of N9137H was not functioning properly. N9137H lost directional control due to lack of effectiveness from the left rudder and left brake.
