

Kurt Gibson
Aviation Accident Investigator
Division

Date: 03/27/2025
Subject: ERA25LA094 – Gear swing video
Contact: Donald Dingeldein – FAA Inspector

The FAA inspector provided a video of his testing of the landing gear of N458K. The video depicts the landing gear being retracted, followed by the landing gear extending. The landing gear extended and retracted utilizing the normal landing gear motor and locked into place without the need to utilize the emergency gear extension.
