Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

During an MEI practical test, the applicant completed maneuvers and several landings successfully. While simulating a single-engine landing, the right main gear indicator failed to illuminate, and the gear warning horn sounded. After aborting the landing, we departed to the NW practice area to troubleshoot the issue, attempting multiple emergency gear extensions and high-G maneuvers for 90 minutes without success.

With all options exhausted, we requested a gear-up landing at KPMP. The left and nose gear were retracted for the landing. On final approach, fire rescue was in place. The left engine was feathered and secured first, followed by the right engine in the flare. After a controlled gear-up landing, the aircraft came to a stop, and the applicant safely exited while I shut off all systems
