DAMAGE TO AIRCRAFT AND OTHER PROPERTY					
Aircraft Damage ☐ None ☐ Substantial ☒ Minor ☐ Destroyed ☐ Unknown	Aircraft Fire ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Fire at Unknown Time ☐ On-Ground ☐ Unknown	Aircraft Explosion ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Fire at Unknown Time ☐ On-Ground ☐ Unknown			
Description of Damage to Aircraft and Other Property <i>(Use additional sheet, if necessary.)</i> Gear up landing minor damage					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink.)</i>					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible. During a recent training flight with a student, the flight proceeded uneventfully until we were approaching the airport for landing. As we neared the airport, we received instructions to join a 5-mile final behind a Cessna 172. It was a busy Sunday afternoon, and I instructed the student to focus on flying the aircraft while I managed communications and kept an eye on the slower traffic. As we were on the 5-mile final, we were cleared for a straight-in approach to Runway 22. While monitoring the traffic ahead and considering the possibility of a go-around due to our higher speed compared to the Cessna 172, I instructed the student to perform the GUMPS check. However, I failed to verify whether the landing gear had been lowered, as I became distracted with managing radio communications and observing the traffic. There is also a gear warning horn that I got so accustomed to that may caused me not to here it. By the time I realized my oversight, it was too late to initiate a go-around or lower the landing gear. This experience reinforced the importance of always double-checking critical flight actions, even when there is a lot happening in the cockpit. I learned that, despite trusting the student to perform the checklist, I should have personally verified the gear before committing to landing.					
OPERATOR/OWNER SAFETY RECOMMENDATION <i>(How could this accident/incident have been prevented?)</i>					
The incident could have been prevented if I had better managed the distribution of tasks and ensured that the checklist was always confirmed. Going forward, I will implement a system where I announce each step of the checklist verbally, allowing me to confirm its completion even when I'm occupied with monitoring traffic or managing radio communications. This will ensure that I can always verify that the critical checks, such as the gear, are completed properly. Additionally, I will make a point to ensure that when we are not directly involved in another task, such as monitoring traffic or handling communications, I can maintain a more active role in overseeing the checklist and flight duties to prevent any further oversights.
