Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Aircraft was hit by an Ops truck with a plow. The Propeller was rotating when we were hit by the truck. The propeller and crank shaft were bent to the left as was the entire engine. The cowling is destroyed, the spinner destroyed, the engine mounts snapped. The engine cradle is bent left.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My student and I were engine started and had already received clearance to depart. At approximately 0826L/1326Z I called for Taxi clearance with ATC. ATC gave us Taxi clearance to Rnwy 10 via N/H. I read back the instruction and finished with "Good Morning" to which they replied, "Good Morning". I initiated our ground roll and within seconds a truck appeared out of the right corner of my view. I immediately pulled power to idle and slammed on the breaks. The truck, which was at full speed, never attempted to avoid us and continued on his intended path slamming into the right side of the engine compartment with the engine running. The propeller went over his hood, contacted the drivers front left window pillar and then continued down the left side drivers door stopping near the gas cap. We were spun left about 90 degrees where we came to a rest. I immediately contacted ground to notify them we were hit by an ops truck. They replied "Roger" and we secured the plane before egressing. Upon egressing, the driver of the Ops vehicle got out and asked us if we were ok. He then proceeded to tell me that he's going to be fired for this, he never saw us, he was on a computer. I asked the driver if he was monitoring ground to which he replied "yeah, but it didn't cross my mind".

This was a local student training flight in the pattern. There was no destination as we were not leaving the pattern. We never left the main parking area before getting hit. After being hit, I walked my student into the Freeman Jet Center to stay warm. Maybe 5-10 minutes later Airport Fire and police arrived on scene. The FDP took our vitals twice, the police took our information and our statements. I notified the aircraft owner and my 17 year old students parents.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Tower gave taxi clearance which concerns me that they were not looking at us when they gave it. Had they of been looking, they would have been able to hold one of our positions to prevent collision. The Ops truck driver heard the ground taxi clearance and proceeded to cross the taxiway regardless. The truck driver was distracted by a computer while operating a motor vehicle around planes. Ground Operations creates "Hot Spots" by plowing snow berms soo high on taxiway intersection corners that no one is able to clear the area before proceeding. Prior to and during our movement all we have to rely on to remain safe is the clearance we are given by ATC ground. Our ability to see past the snow berms, that ground Ops created, is non-existent

- ATC Ground must have visual on ground movement prior to taxi clearance
- ATC Ground must prioritize aircraft movement and safety over vehicle movement
- ATC Ground must deconflict any potential hazards prior to taxi clearance
- Ground Ops must adhere to active ground frequency monitoring
- Ground Ops must have responsibility with being familiar with all taxiway and facility locations
- Ground Ops must have responsibility with radio clearances in conjunctions with airport familiarity to prevent inadvertent hazards during aircraft movement.
- Ground Ops must not be on portable electronic devices during ground movement
- Ground Ops must not plow snow in such a way that adds increased ground movement hazards
- All vehicles should give way to all aircraft as this is an airport not a freeway

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
