☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Right main wheel and nose wheel came off when they hit the icy snowbank berm prior to the beginning of the ice runway/displaced threshold.

When the gear hit, the nose dipped and caused a prop strike on the ice

Damage to the

right wing was caused when sliding into a snowbank on the side of the ice runway

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After performing three short field take offs and landings at Nashua (KASH) Airport, I picked up a passenger and obtained a squawk code for VFR flight following for a flight to Alton Bay (B18). I departed Nashua Airport and climbed to 3500' until within 10 miles of Alton Bay. I started my descent and headed to the east of the runway to enter on the 45 degree for the upwind leg. No traffic was in the pattern.

I flew a standard traffic pattern other than a lower and slower final approach than I normally would due to known lack of breaking action on the ice. Per suggestion of an online video the night before, I used the icy snowbank as my aiming point. My approach was too low and slow. I ended up clipping the aiming point icy snowbank with the nose and right main wheels which caused the nose to dip and the prop to strike the ice. The airplane spun around on the ice and ended up with the tail into the snowbank on the right side of the displaced threshold just prior to the runway.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
