Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Destroyed by fire. Several cars damaged by impact and fire.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had received the plane back from significant upgrades and overhaul of fuel pumps a week prior. The plane was reporting odd fuel PSI/flow but was assured this was due to settings in the new EIS system that needed tweaked. Ground runs, high speed taxi and a test flight the day before the accident were un-eventful on March 8th.

The aircraft was fueled after the test flights on March 8th. On March 9th, I prepared for the flight like normal including flight planning and aircraft checklist including sumping the fuel. The flight was filed for IFR but weather was VFR.

We departed runway 26 at KLNS. Shortly after take off we heard a loud bang and thinking it was engine related I reduced the throttle. Upon realizing it was the door I believe I pushed the throttle back in. I recall being confused why power was not increasing but given the low altitude was unable to run through normal checklist items. I recall planning for an off-airport landing. I do not remember anything else including the impact.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I should left the throttle in until I had verified if the sound was engine related or not.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Unknown. I cannot explain why I did not regain power after pushing the throttle back in.
