☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Fuel leak on the left wing and propeller damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The accident took place during student pilot solo. My instructor and I completed three takeoffs and landings to ensure I could land C162 safely. I dropped my instructor off at the ramp after three landings. I made two safe landings in the traffic pattern on runway 9L under tower control. On the last landing, the approach looked good, and the flare was performed well, but when I touched down, the airplane began to bounce. I initiated a go-around, but it was too slow to begin rotating and entered a power-on stall at the low altitude.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Initiating go around as soon as the airplane started bouncing without landing attempt

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
