Hi Mr.Marlowe,

My name is Satish Chigurupalli, I was the pilot flying (PF) in the plane with tail no N8339Y that met with an accident at KAND airport on 21st Mar 2025. Here is my statement of the incident mentioned below.

It was around 11:30 Am of March 21st. We were coming down to land from a traffic pattern and landed on the runway very safely. During the landing roll the nose started to vere off left and right and I started to correct it. I felt like the plane was not in my control and I was trying to get it to a stop but while I was trying to stop the plane , the plane was already off the runway and on to the next taxiway and ended up in a ditch past the taxiway. it all happened so fast that there was not time to properly come to a stop. The propellers were bent and the plane came to a full stop. Both the student and the instructor in the plane were safe and unhurt.

As this is my first Incident/Accident, I apologise if I have not done any due process. I request you to please let me know if anything else needs to be done. Thank you very much for your time.

Regards
Satish Chigurupalli.
