NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed on a cross-country flight from Wadesboro, NC (AFP), bound for Somerset, KY (SME), on 2/25/2025 at 1:45 PM. My cruising altitude was at 2500 feet for the first 45 minutes before starting an ascent to clear the upcoming terrain. At around 6500 feet I noticed the engine rpm rising so I adjusted it down. Shortly later the engine rpm began rising again but this time the response from my input seemed to be erratic. I decided not to continue over the mountains, so I reversed course and diverted to Hickory, NC (HKY). After my new course was set, I began searching for the proper radio frequency. About this time the engine suddenly suffered a catastrophic failure with engine parts being blown through the cowling before completely locking up. I pulled the mixture, hoping to prevent a fire, and began looking for a suitable landing site. I saw what looked like a long corn field and chose it as an emergency landing site. About a mile out, I realized that the corn field that I had chosen was preceded by a private grass airstrip. I still had electrical power, so I immediately lowered the landing gear and extended the flaps hoping to be able to stop on the airstrip before it ended. Unfortunately, I touched down about two thirds down the runway and a little fast. I was unable to stop before going through a barbed wire fence at the end of the runway.
