Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Damage to right landing gear, cowling, and propeller.
\$200,000 in damages to a fence.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I checked the weather, discussed flight purpose, fueled and preflighted the plane with the checklist. The plan was to remain in the pattern at SHD Airport, conducting landings for currency. With the student at the controls, we had an uneventful taxi, takeoff and landing. We then departed for a second circuit in the pattern. Abeam the numbers on the downwind, she began a descent, reduced power, applied carburetor heat and ran the checklist. At around 600 AGL, turning base to final, I advised the other pilot to add power to avoid sinking below the proper glidepath. She replied that the engine was not responding to throttle command. I immediately took control of the aircraft, pushed the nose down to maintain airspeed, and verified that fuel, mixture, primer, switches and carburetor heat were in the correct position. At 300 AGL it was apparent that the plane would not clear a road and guardrail short of the runway. I elected to turn right to land in a field. I landed, rolled through a wire fence, and came to a stop in an adjoining field. I verified the gas was off and immediately exited the aircraft along with the passenger and confirmed that she was ok. (continued on next page)

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I followed proper procedure, including checklists and the proper use of carburetor heat. I have not yet heard an official report from the FAA/Lycoming engine inspectors. Perhaps they will shed more light on the incident.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

ADDITIONAL INFORMATION (Additional space for answers to any question.)

A herd of cows gathered around the plane. I tried to fend them off to keep them from further damaging the plane, and also keep them from wandering through the hole in the fence and up on to the road. A farmer stopped by to assist. The farmer advised that the police were on their way, so we waited for their arrival to fill out a report. I returned to the plane to verify that all checklist items were complete.
