Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

FRONT NOSE, FRONT LANDING GEAR AND LEFT WING TIP & RIGHT WING STRUCT.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I just bought a Challenger 1 Clip Wing May 3rd had been saving up for years to get back into flying. My wife Judi found she had Kidney Cancer and I had to retired to take care of her and She passed away last Thanksgiving morning, we were married for 53 years.

The accident was my FAULT I should have not took off, and only should have been taxiing! I'm 6' .7 inches tall. I was too cramp in the plane, had problems with the peddles getting my feet on them as I wear a size 14 shoe. After getting my feet on the peddles I decided to taxie on the runway 2050 feet long 200 ft wide and after 5 trips up & down I had control of the airplane so I decided to take off and do a pratect landing, I let my ego get the best of me I was so excited about flying which I should had never took off it was a bad judgment on my part. the runway heading is 270 degrees. After I was air-born I had problems with the peddles too much with the left one, my foot was stuck and trying to get my foot up to be-able to control the airplane. My left foot slip off and got stuck under the left peddle I pull my foot up cutting my rigjht side of my heel and my shoe got stuck under the left peddle. I cut my needs on the bottle of the instrument panel. I had to land as I did not have control of the airplane as I was about 350 ft AGL at 45 mph heading around 310 degrees. I saw a place to set the plane down and I tried to get it to turn left but my shoe was wegged under the lest peddle I cam in at 30 to 35 MPH and was trying to set the plane down, I got it down around 5 to 6 feet of the ground and there was 25 to 40 foot Trees ahead of me and I did not want to hit the trees so I push the stick down an hit the ground Nose first, was hard and was stop about 50 feet from the trees. I had cuts and scrapes on both legs and arms and a brused right foot. I ask God to help me and I was lucky to have only minor injures. The landing was around 315 degrees with wind gust around 8 to 12 plus from 270 degrees.

From the Start I should have NEVER TAKING OFF VERY BAD JUDGEMENT ON MY PART AND LET MY EGO GET THE BEST OF ME!

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

SHOULD HAV NOT TAKENG OFF BAD JUDMENT, TOTAL MY FAULT.
