NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Normal Flight, fuel was topped off the day before by DQH. I inspected the aircraft as usual, Oil, looked for anything unusual, checked fuel for water (no water) and made sure it was topped off. I loaded the bags (1 suit case, 2 small duffle bags and a purse). After starting the plane, I programmed the GPS to Lagrange GA as a waypoint then to Murfreesboro Tn (Our destination) I Departed RWY 22 from DQH around 10am ET. I climbed to 6500ft set the RPM at 2350, MP at 23.5, Mixture set at 17 Gal/Hr, EGT temps at 1,360. I swapped tanks 1/2 way to LaGrange, at Lagrange, then 1/2 to Murfreesboro Tn. I got around Alabama/Tennessee Line, I then descended to 4500ft and around 35-40 miles from Murfreesboro the engine stuttered so I swapped tanks again and pushed full mixture, took several seconds but it cleared up. I looked at GPH and EGT and it was the same as it had been, so I thought it was odd and thought might have been water (which none showed up on Pre-inspection) I thought I'd remain on the current tank to land. I continued to descend toward pattern altitude (2000ft) so I could prepare for a downwind for Rwy18. There were multiple planes in the pattern so at around 7.5 miles I made a call to Murfreesboro Traffic that I was 7 miles to the South and would be entering a downwind for Rwy 18, continuing the descent I was around maybe 2500ft 3-4 miles out and the engine stuttered again and went almost idle. I immediately switched tanks, pushed mixture to full (which was already set at full), I pushed the RPM to 100% and the throttle to 100% with no response, I played with it for a few seconds and nothing. I turned toward the South end of the airport airport and made a call that I had engine failure and needed RWY36, I got a reply they would give me room, he asked if I was declaring emergency and I replied "yes" I quickly realized I wasn't going to make the field and would end up hitting houses so I looked around and my best option was a green South of the field, so I made a call telling him I wouldn't make it that I was turning left to a cemetery south of him, he replied "Good Luck" I lined up for the Green grass at the cemetery knowing I had to slow down as much as possible since the spot was small, so I dropped the landing gear and pulled up on the nose and hoping to clear the trees but I hit the top of the trees. I felt I didn't have enough altitude or airspeed to keep trying to get the engine back, so I just tried to fly the plane to the safest spot I could find.

To Whom it May Concern:

I Sarah Elizabeth Black was on board the aircraft 15PM that went down in Murfreesboro TN on Tuesday 10 2025. I was on board with William Amerson (Boyfriend) and Adam Smith (Williams Cousin). I was seated on the rear passenger side facing the back of the plane. I heard William make a call to the airport our position and his intentions, a couple seconds later I heard him say something about losing power, he then made a call to the airport that he lost engine power and was need them to clear out so he can turn direct to the airport, a couple seconds later he made a call that he wasn't going to make it and was turning to a field around a cemetery. I just found something to hold on to thinking it's going to be a rough landing then I heard him say "hang on"! Next thing I remember I was covered in luggage while William Helped me get out.

Normal Flight, fuel was topped off the day before by DQH. I inspected the aircraft as usual, Oil, looked for anything unusual, checked fuel for water (no water) and made sure it was topped off. I loaded the bags (1 suit case, 2 small duffle bags and a purse). After starting the plane, I programmed the GPS to Lagrange GA as a waypoint then to Murfreesboro Tn (Our destination) I Departed RWY 22 from DQH around 10am ET. I climbed to 6500ft set the RPM at 2350, MP at 23.5, Mixture set at 17 Gal/Hr, EGT temps at 1,360. I swapped tanks 1/2 way to LaGrange, at Lagrange, then 1/2 to Murfreesboro Tn. I got around Alabama/Tennessee Line, I then descended to 4500ft and around 35-40 miles from Murfreesboro the engine stuttered so I swapped tanks again and pushed full mixture, took several seconds but it cleared up. I looked at GPH and EGT and it was the same as it had been, so I thought it was odd and thought might have been water (which none showed up on Pre-inspection) I thought I'd remain on the current tank to land. I continued to descend toward pattern altitude (2000ft) so I could prepare for a downwind for Rwy18. There were multiple planes in the pattern so at around 7.5 miles I made a call to Murfreesboro Traffic that I was 7 miles to the South and would be entering a downwind for Rwy 18, continuing the descent I was around maybe 2500ft 3-4 miles out and the engine stuttered again and went almost idle. I immediately switched tanks, pushed mixture to full (which was already set at full), I pushed the RPM to 100% and the throttle to 100% with no response, I played with it for a few seconds and nothing. I turned toward the South end of the airport airport and made a call that I had engine failure and needed RWY36, I got a reply they would give me room, he asked if I was declaring emergency and I replied "yes" I quickly realized I wasn't going to make the field and would end up hitting houses so I looked around and my best option was a green South of the field, so I made a call telling him I wouldn't make it that I was turning left to a cemetery south of him, he replied "Good Luck" I lined up for the Green grass at the cemetery knowing I had to slow down as much as possible since the spot was small, so I dropped the landing gear and pulled up on the nose and hoping to clear the trees but I hit the top of the trees. I felt I didn't have enough altitude or airspeed to keep trying to get the engine back, so I just tried to fly the plane to the safest spot I could find.
