

James Mitchell's Statement: June 24/2025 approx. 10:55 AM CST.

I saw the aircraft coming into land and noticed it was wobbling as it was coming into land. I stopped cutting the grass and turned and moved my mower closer to the perimeter fence to stay out of the way of that wobbling aircraft coming into land. As I watched it land, it hit runway and proceeded to bounce up and down 3 times, and I saw the nose hit the ground and the left wing drag on the runway. I also saw it right itself and not dragging the wing on the ground anymore. I then saw it get off the runway at one of the exits further down the runway.
