☐ In-Flight
☐ On-Ground
☐ Both Ground and In-Flight
☐ Fire at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Lower Left wing damaged 2 ribs and spar and wing covering.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off on the morning of July 31, 2025 under VFR conditions and flew from KTFE to KVMC and landed. After having lunch at KVMC I took off under VFR conditions and flew back to KTFE. The ATIS at KTFE is out of order and there were no other aircraft in the area, so I had to use the windsock to determine the wind speed and direction. There seemed to be a slight wind out of the northwest at between 5-7 kts. So I chose to land on runway 22, the best runway for the wind direction. I did a wheel landing and held the tail wheel off the ground until the airplane slowed enough to lower the tail wheel. With all three wheels on the ground I continued down the runway at about 5 kts or slower. A sudden gust of wind from the northwest caused the airplane to veer right and roll into the grass on the right side of the runway. My lower right wing hit the PAPI light box near the runway.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Next time be prepared to apply differential light braking and aileron deflection after lowering tail wheel on landing rollout.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
