I was about to fly, I picked up the weather and rolled out of my parking spot. I saw the plane to my left and I thought that he was slowing down for me to join the taxi and so I kept pulling out. Upon momentarily glancing at my instruments to ensure safety of operation I noticed movement of other aircraft as I saw he is trying to squeeze in and about to hit me so I tried to get out of way and avoid collision but his wing went over my plane and my propeller started clawing into his right wing and when I noticed that I immediately cut the mixture, mags off and battery off and stepped out of the airplane.
