NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying solo on 8/8/25 at ~ 6:15 pm @ KPTW in Cessna 152 N69200. I was flying solo after my last flight as solo in the same aircraft (on 4/14/25). I was planning to stay in traffic pattern and do 3 take off and landings at the end of my busy day. My first approach was not optimal. I was too high so I did a go around. On my second approach I was quite fast on final ~ 70-75 kts. I should have done a go around again. But I don't know why I made a wrong decision. On touch down the airplane bounced and did a tortoise (2-3 times) and ended with the propeller striking the ground and plane stopped with the nose down and tail up on the right side of the runway 10. I realized later that the flaps were only 10° down. There was no fire. I walked out of the airplane through the left door. I walked back to the airport & informed them of the incident & asked them to radio ASAP to close the airport. I did not sustain any physical injuries but obviously I was in shock. I contacted Airport manager &

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

- helped the crew to move the aircraft to the tie down. I helped clear the debris on runway.
- I should have done 2nd go around and ensured a stable approach on final.
- I should fly more frequently.
- I may have been tired after a day of busy work.
- weather and wind was not a factor on that day.
