Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Left wing Partially heavily bent in multiple area, Forward Spar severed and skin detached.

Forward fuselage section heavily dented.

Mid fuselage section skin detached from bulkheads and heavily twisted and bent

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The Pilot acting as Student flew her first solo the week before the event and for the day of the event she flew 2 satisfactory flights with CFI-G on board doing pattern to land training from the Runway Safety Area 2600x120 ft parallel to Rnwy 18, which is normally used for Glider operations and locally called "Runway 18/36 Grass" taking off using Aero-tow to the south and landing toward the North. For flight number 3 she was solo on board and was planning to perform a pattern to land as previously trained

What follow is a sequence of event observed from ground at end of Runway 36 Grass

- 1) Glider arrived high on a left downwind for runway 36 Grass
- 2) Didn't lose much altitude along the downwind.
- 3) Turned to base high, spoiler status not visible from ground.
- 4) Turned to final very high, executed two left end circles with spoilers open without noticeable loss of altitude.
- 5) After the second turn student aligned with the runway and performed a forward slip with closed spoilers.
- 6) The slip was stopped about 50 ft from the ground and above the South end threshold of runway 36, spoilers observed closed and glider noticeably accelerated once slip was terminated.
- 7) The glider flew with visible PIO along the length of the runway maintaining approximately 50 ft without losing much speed, pilot finally opened spoilers about two thirds of the length of runway and initiated a shallow right climbing turn.
- 8) At this point there was no runway length remaining, The glider lost a lot of speed and started banking to the left showing an incipient spin condition, this prompted a radio call from the ground "nose down" which student heard and followed recovering from a possible spin but still in a very low energy state and with the glider now pointing South West with a 45 degree left bank and about 15 degree nose down.
- 9) The left wing impacted the ground in the shallow ditch between the North threshold of Runway 18 Paved and Runway 18 Grass then cartwheeled forward, the nose section impacted the ground but remained intact except damage to the nose.

The glider came to rest in a normal upside up position, the canopy was opened by the pilot, who was vigilant and could move but declared sharp back pain and difficulty breathing. It was decided to call 911 and wait for Paramedics to arrive and extract the Pilot in order to minimize possible spinal injuries. Paramedics arrived in about 5 minutes and she was extracted promptly with all professional precautions.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Total Time/ Cycles On Part

_____ Hours

_____ Cycles

Time Since This Part Inspected/Overhauled

_____ Hours

FUEL & SERVICES INFORMATION

Fuel on Board at Last Takeoff

(Convert from pounds, as necessary)

_____ Gallons

Fuel Type

☐ 100 Low Lead☐ Automotive☐ Jet A☐ Jet A-1☐ Unleaded AV☐ Other, specify _____

Other Services, if any, prior to departure:

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for *other* aircraft.)

Aircraft Registration Number

Manufacturer: _____

Model: _____

Damage to Other Aircraft:

☐ Destroyed☐ Substantial☐ Minor☐ None

Registered Owner of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____

Pilot of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____
