Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Damage to aircraft involves prop strike, empanage, flaps, struts, wings, etc. Damage resulted from nose wheel sticking in soft downsloping ground and plane tipping over forward landing upside down in scrub brush at end of runway.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

2005 Cessna Skylane 182T

1A3 to 57GA

Date: 9/20/25

Local Time: 11:45am ETD - 12:00pm ETA

Pilot: Bradley Henninger

Filed VFR flight plan from 1A3 to 57GA. After refueling at 1A3 in Copperhill, TN I took off on RW 20 with calm conditions per windsock. From ForeFlight, predicted winds were calm at 57GA. This area involves several mountains. Climbed to 3500' on our way to our home private airport 57GA (elevation is 1946' MSL) in Blue Ridge, GA. Followed a 196° heading to airport. Flew just east of airport from north to south then east to west to visually check conditions of runway 36. Runway is in a valley between several mountains. Tree leaves, flag, and windsock appeared calm. Then entered left downwind for RW 36 at TPA (2946' MSL) then turned to left base. Initiated a go around since plane was not on proper glide slope to aiming point. Completed the pattern again. Then landed on the 3100' runway. Conditions were calm. I landed long touching down about half way down runway. Applied firm braking but rolled past end of runway. The nose wheel dug into down sloping soft ground past the runway and the plane tilted forward on its nose and flipped.

I did not initiate a go around due to the length of the runway and uphill slope and trees. At this private airport (57GA) departures are to the south (RW 18) and arrivals are to the north (RW 36).

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Land short of halfway point on runway 36 and apply brakes sooner.
