Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Prop and rotor, tail section and rotor head. Scratches to one side of canopy and body of aircraft.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I went to KHVC to practice take off and landings. It was a pretty afternoon with variable wind at 4 knots with left cross wind according to the wind sock. On the 5th touch and go at about 1810 I was probaly up to 40 MPH when the left wheel elevated and I applied more left stick. The amount of left stick I applied was insfficient to stabilize the aircraft. With in seconds the rotors made contact on the right side to the asphalt. These actions caused the aircraft tip onto the right side.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Maybe some ballst in the back seat as I had 40 plus hours of dual instruction in such a small aircraft. The aircraft performance and handling very different when solo.
