Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Underbelly with prop strike TBD

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After doing some aerial work (BFR) south of Wayne County. We headed back to Akron Fulton for some pattern work.

Entering the downwind from the southwest at approximately 2000 feet proceeded to join the traffic pattern. When we were a beam the threshold for 25 I put in one notch of flaps and continued on the downwind approximately 1.5 miles I turned base and lowered the gear for runway 25 and added the second notch flaps. Called base to final and when we were assured to make the field, I added the last notch of flaps. Started the flare may be a little too high, felt a bump, and proceeded to land. Continued in the flare to land, impacted the center of the runway and slid to a stop. When the plane came to a complete stop, I secured the fuel selector to off, magneto off, and radioed through com that the field was closed. Opened the pilot door and egressed with my passenger outside the plane. While standing on the runway, in close proximity to the aircraft, I could see some smoke, proceeded to get fire extinguisher from cabin within minutes the ground crew disconnected the battery. The smoke may have been a result of the aluminum fuselage grinding on the runway.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
