Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Broken Propeller, Right landing gear leg bent, left front landing gear mount broke off

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The plane was pulled out of the hanger. We then performed a walk around of the plane. after the walk around was completed we both got in the plane and strapped in. I started the plane then turned on Alternator switch and checked for charging. next i turned on Radio, avionics, Transponder, Adb, and Strobe switches. Once everything was on and ready i started the warm up process. The warm up involves slowly increasing the rpm to different levels while Paying attention to both water and egt temps. Once water was up to temp(140) the warm up process is completed, about 10 minutes. We then got the current atis. next we called ground for a clearance they first offered us 23 but we said no due to wind. next they offered us a intersection departcher from the intersection of 23 and 33 taking off 33. we accepted the taxi clearance and began our taxi. we taxied via Echo to runway 23 and held short of 33 for traffic in the pattern. holding short of 33 i started a runup bringing the rpm to 4000 rpm checking the temperatures then checking both mags then bringing the plane back to idle. at this point i added half flaps to prepare for takeoff. with a succesful runup completed i called tower and said we were ready for departure. once cleared for take off i taxied onto runway 33 and began adding power. as takeoff roll started i double checked guages and all looked good. around 40mph the tail was raised and i let plane hop into ground effect once ready. in ground effect i let it accelerate to 55mph which is vy then began the climb. during the climb i made sure to keep us at the 55mph with a quick glance at temps to make sure they were still good. after climbing a little the plane stopped climbing and felt like a drop. looking at the amount of runway left i asked [REDACTED] and we decided to put the plane back down with the remaining runway. at this point [REDACTED] took control pulled the power to idle and brought us back to the ground. upon landing the plane is when the landing gear collapsed which resulted in a prop strike. we slide along the runway a little bit until sliding to the left and just into the grass where the plane came to a complete stop. once stopped i shut the engine off opened my door then shut off all other switches. next i unbuckled got out and shut the fuel switches off. while doing this [REDACTED] attempted to open his door but was unable and also unbuckled. once i was out he followed me out my door. at this point we got away from the plane and waited for emergency services to arrive.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Knowing the plane had a custom landing gear built by the owner and not the one designed by avid. and also knowing the history of multiple landing gear failures an inspection by a professional or having the plane changed to a proper landing gear could have found issues with the gear or prevented issues from arriving.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Landing gear mount broke off. Part is a previously repaired mount from the original owner.

City: _____

State: _____ ZIP: _____

State: _____ ZIP: _____

Country: _____

Country: _____

ADDITIONAL INFORMATION (Additional space for answers to any question.)

The ELT did no activate. The landing and following gear collapse was not hard enough to activate it.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE.

I understand that the information provided may be subject to public release.
