Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Tail rotor was damaged... needs new one

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was repositioning the helicopter from the grass to the platform (skid). I was flying with a commercial rotocraft pilot, and we tried to land on the skid, but the skid was too close to the building for that wind. Other pilot exited to move the skid.. and when he had it moved, I lifted up and flew for 30 seconds (small circle) to approach the platform. The helicopter developed a severe shake to it and I decided to just put it immediately down the grass again. The landing was fine, but the helicopter weather vained into the wind and the tail rotor hit the 4 ft. mound of dirt in the rear.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I wish it had not been so windy, with the wind whipping around the building. If the skid had been in an area of clear air., it would have been fine.
