Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Airframe damage at forward, aft and tailboom structures. Rotor system damaged at starflex and all blades displayed impact damage. Landing gear was spread and left skid and step broken. Tail boom buckled mid tailboom.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At 12:32 CDT on November 8, 2025, aircraft N107VU, operated by Air Methods LLC as Vanderbilt LifeFlight 01, departed from the Gallatin base on an air ambulance flight in response to a scene request. At approximately 12:42 CDT the crew was informed that the request had been canceled. Shortly thereafter, the aircraft executed what appeared to be a 180 degree turn at an altitude of approximately 4,000 feet MSL, followed by a rapid descent.

At 12:49 CDT, the Air Methods communications center determined that the aircraft had landed at an unplanned location. A PAIP (Post-Accident Incident Plan) was initiated, and confirmation was received from 911 services and a call from the U.S. Air Force indicating that the aircraft's Emergency Locator Transmitter (ELT) had been activated. It was subsequently confirmed that the aircraft had been involved in an accident. The incident occurred in an open field near Gallatin, Tennessee
