Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Jump door, underside of wing, door frame, firewall, cabin tunnels, etc.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I [REDACTED] am a skydiver pilot at the KSFZ airport. After the skydivers left the plane I closed the jump door. I was having trouble latching the door on both sides, so I let go of the door to reset and make a radio call. In that time, the door was flapping uncontrollably, by the time I was able to wrangle the door I knew I had to hold the door closed with one hand to prevent further damage to the plane. I decided to enter the traffic pattern on an extended left base for runway 5 while holding the door closed. When I was on final I saw that I was low with the papi lights, I continued to hold the door with one hand and yoke with the other. I decided this was a time to trim the plane to help me with the controls. I quickly used muscle memory to trim the nose up, when I learned the trim controls were backwards it was too late in the flare and and landed the plane very heavy on the nose wheel.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Aircraft was delivered from annual inspection with flight controls improperly installed. Proper verification of work done before test flight and release of aircraft would have prevented this incident/accident.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)**Was there Mechanical Malfunction/Failure?** ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
