Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Passenger side wing destroyed, Pilot side landing gear destroyed, windshield and nose cowling broken/bent, Prop destroyed

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday 10/24/25 we left 6J6 and flew to 95SC where we visited for a short while with the owner of Buckeye Field. The trip was about 32 statute miles.

Around 3:00 pm, we decided to head back to 6J6. I checked the wind and determined runway 31 was best runway. I back taxied to the end of 31 and performed run-up and takeoff procedures. I verified passenger was good and I aligned with center of runway and applied full power. Air speed came alive and gauges in green. When I reached rotate speed at 55 mph, I eased back on control stick. We left the ground and began our climb out. Shortly after getting airborne a wind gust from the right lifted the right wing and turned the plane to the left. I attempted to straighten the plane but was too close to the trees. I clipped the tree tops and landed in the top of a tree. The plane wedged and a friend helped us down.

No EMS or 911

No Injuries

Substantial damage to plane
