Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

The other aircraft sustained significant propeller damage, with two of the three blades destroyed. This level of impact likely resulted in internal damage to the engine assembly. Additionally, the aircraft's canopy became lodged beneath our wing, causing surface scratches; however, the canopy remained intact and did not fracture.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight was a mock solo to the practice area in Cessna Skyhawk N825KS. I was flying with my CFI, [REDACTED]. The incident occurred in the run-up area for Runway 5 at KBCT.

After completing our run-up, I taxied forward to the hold-short line for Runway 5. I contacted ATC and requested takeoff clearance. Once cleared, I began the "clear for takeoff" checklist. While completing the checklist, aircraft N202R0 approached our position from the left of our nose. At that point, my instructor took control of the aircraft and maneuvered to the right to avoid a head-on impact. N202R0 struck our left wingtip with its propeller. Two blades of the aircraft's wooden propeller shattered on impact. N202R0 continued rolling forward beneath our wing, causing its cockpit canopy to become trapped under the wing. The pilot of N202R0 was unable to exit the aircraft until the Airport Authority personnel repositioned his plane.

Immediately after the impact, we reported the collision to ATC and shut down our engine. Other aircraft in the run-up area notified ATC as well. We remained in N825KS until the Airport Authority confirmed it was safe for us to exit.
