- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Nose landing gear damage, damage to left wing/prop with a prop strike. Left landing gear destroyed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Preflight conducted IAW SOP @ approx 0500. Winds were calm so decided to take off RWY 23. Clicked lights on to their brightest settings. Conducted runup IAW SOP. Once takeoff roll started, right rudder was applied for yaw correction. On takeoff roll I noticed a small animal dart towards the runway. At that point I released a little bit of right rudder but did not abort takeoff or pull power. By the time I collected myself I was very close to the runway edge lights and I believe one took out my left landing gear. This led to complete loss of control of the aircraft.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

I believe this could have been avoided by proper aborted takeoff procedures. Fatigue was also a factor, and focusing on the lights instead of trying to avoid them. Also, better animal control at airports.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
