**Description of Damage to Aircraft and Other Property** *(Use additional sheet, if necessary.)*

one square foot torn out of the right aileron, tear on cover on right main landing gear strut, paint scuffs on nose wheel and main gear covers, paint abraision on right side of plane.

electric power line torn in two.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I flew the downwind leg at 1900 ft altitude then turned base leg and was turning final. About this time the plane dropped in altitude several feet, the stall warning horn did not sound. I added full power and leveled off. At this point i saw the power line out the pilot side window at the same altitude as the plane, it was not visible out the windshield looking straight ahead and there was no time to avoid the powerline. The plane struck the line with the main landing gear. Prior to the line breaking it slowed the plane down so I had to shove the nose down and added full power to regain control of the plane. I regained control and proceeded to land on Runway 28 at Parr with no additional issues.
