Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Both props/engines sudden stoppage, belly antennas, belly channels, both flaps, tail hook, fuselage step, sheet metal.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 11/25/25, at approximately 10:30pm local time, I experienced a gear up landing in N441HG (PA-44).

Conditions - VMC

Location - KEZM

PIC and Pilot Flying - Myself [REDACTED]

My student and I along with a backseat departed out to KCSJ for a cross country flight. We had dinner, then departed KSCJ under IFR with intentions of shooting an approach into KSSI for a touch and go, then departing the area to head back to KEZM. We flew as planned then canceled IFR upon visual contact with KEZM. We were short on the time requirements, so we decided to do landings until the time requirements were met. Everything was going great and we had met the time requirements and so we decided to call it after "said" landing. The final landing ended up being a gear up landing. Upon realizing the damage had already been done. I decided best course of action was to shut everything down, everyone exit the aircraft then let authorities and my boss know so appropriate actions and notices could be made.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
