Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

- Cowl damage
 - ALG Sheared
 - wing damaged

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On January 8, 2025 I was the PIC and sole occupant of N29UA on a Part 91 flight which departed KBLM at approximately 1540z en route to KLEX. This was a VFR flight and I was squawking 1200. At approximately 1720z I began a visual approach to RWY 26 at 79D, descending from 8,500 MSL. The weather was clear and winds at the airport were calm. I made several radio calls on 122.9 announcing my position and intention to land. The aircraft was configured for landing with full flaps. The aircraft touched approximately halfway down the 3,300 ft. runway and I applied the brakes hard so as to stop before the end of the relatively short runway. I was unable to bring the aircraft to a stop on the asphalt, and it continued forward onto the grass that was beyond the runway. The grass area led to an embankment, and the aircraft impacted the ground at the bottom of the embankment and sustained significant damage. I was uninjured.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

- Lower speed on approach
 - Go around when aircraft floated
 - Selection of airport with longer runway

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
